

# Slot Tournament Management System™ v2.8

## Self-registration integration for STMS

### Program

Custom configuration to handle your casino's Swipe card encryption

### Swipe

Patrons can swipe their own player's cards at any designated registration kiosk

### Register

Video display walks patrons through easy touch screen registration process

### Confirm

Confirmation ballot is printed on spot and registration is recorded in database

### The Self-Registration Solution

Built for integration with any kiosk, this self-registration solution delivers engaging, user-friendly content with dynamic graphics to attract users and increase utilization. Systems can be integrated with a limitless number of hardware peripherals such as magnetic card readers, monitors, speakers and printers.

### Slot Tournament Integration

Patrons can register for tournaments on their own which cuts down on long lineups and decreases staffing requirements

Session display allows patrons to view all available seats and times when registering

Video display is configurable from STMS application. Promotions can be scheduled to play in between patron registrations or during inactive periods

## Features

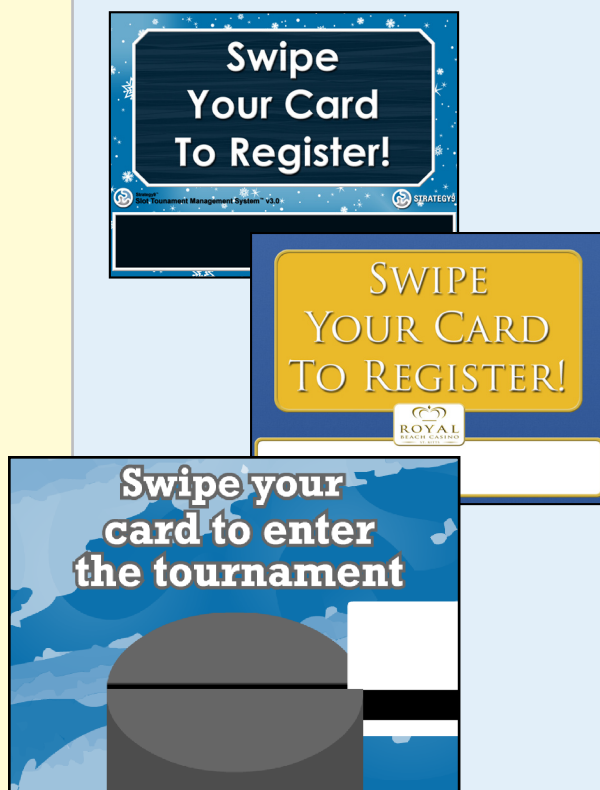

Kiosks include monitor, software, printer, speakers and magnetic card swipe

Multiple presentation formats – can be delivered in tabletop swipe stations, booths or full kiosks

Custom screen / kiosk design – Graphics of both the swipe station and the onscreen presentations can be customized to match the specific promotion

Administrative screens – Backend interface provides administrators with the ability to modify rules, customer responses and offers at any point prior to or during a promotion

Easy to manage – Detailed error screens are presented to users thereby minimizing the need to maintain host supervision throughout a promotion

### Why use Self-registration with STMS?

Customized reporting. All data is represented in easy-to-read format highlighting participation by date, time of day and customer origin.

Rapid deployment can be customized and deployed within hours instead of weeks or months for a custom swipe station deployment.

Integrate with STMS and create unified messages.
