

Slot Tournament Management System™ v2.8

Create a tournament, register patrons and record scores
STMS does the rest!

Slot Tournament Management System by Strategy9

Slot tournaments are an effective marketing and revenue boosting tool which provide an opportunity for you to reward your loyal patrons as well as attract new ones. Real time feedback and analysis gives you the power to gain better business intelligence.

New Features for STMS v2.8

Tablet PC Scoring

Rapid entry of scores without the need to move from floor to workstation.

Integrated ROI Worksheet

Administrators can establish slot tournament budgets and expected returns and compare these with actual performance.

Leaderboard Enhancements

User interface permits the tournament administrator to define what is displayed on the leaderboard.

Self-registration Kiosk

Users are presented with buttons containing their choice of Session times (based on available seats) and registration ballots printed upon confirmation.

SwipeIQ Integration

Registration and cardholder information is recorded by using existing membership cards or by sourcing new swipe cards.

User Interface Enhancements

A more streamlined look and new navigational structure and expand the ease-of-use and functionality.

Features

Rule-based Registration

Your hosts will not have to remember or resolve complicated progression rules, player session limits, VIP invite lists, and general tournament seat availability. System alerts highlights session availability and patron qualification for the available seats.

Integrated Leaderboard

Plug scores into the system and generate an automatically updating version of the Leaderboard for use on plasma screens (or other existing video display technology) throughout the facility.

Exclusive Tournaments

Run tournaments for your most loyal patrons. Load member VIPs can participate in 'invitation-only' tournaments.

Multi-stage Progressive Tournaments

Create tournaments that contain qualifying phases toward participation in a final round.

Increase Speed

Recording patron member IDs directly from card swipe

(Enterprise only) speeds all patron interactions with the system (registration, modification, or status lookup). Integration with patron member databases permit your company to personalize the application quickly reducing keystrokes for the entry of patron names and numbers.

Improved Efficiency

Tournament template and copy features (Enterprise only) allow tournament administrators to quickly generate tournaments with repeated settings. Weekly or monthly promotions can be recreated with a few clicks of the mouse.

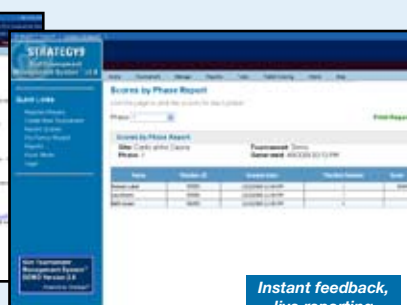

Web-based Interface / Databased Interactions

The centrally managed infrastructure permits your company to expose Player/Q TMS on any network connected workstation in the facility.

*STMS is **built from the ground up on Microsoft architecture**, delivering tremendous business value through easy integration with third-party applications and services.*

Accessible from any Internet browser

Instant feedback, live reporting

Leaderboard display

Benefits

Organization boosts ROI on slot tournament promotions

Smoother operation of slot tournaments will provide the ability for your company to host more tournaments and run more sessions per tournament. This leads to increased fees from paid tournaments and increased opportunity to participate in slot tournament promotions thereby leading to increased revenue and the win for your company.

Automation leads to productivity improvements

With several common features of slot tournaments automated (registration, refund, prizing, reporting), staff dedicated to the operation of slot tournaments can be reduced or redeployed. This can lead to improvements in ROI (lower staffing costs) or improved customer service and satisfaction (due to increased availability of hosts).

Rapid reporting / auditing

With a central system to record registrations (cash, casino points or comps), refunds and prizing, audit staff can now quickly access the information they need for nightly reconciliation. Reports can be printed or downloaded to Excel or CSV format for import into existing systems.

Increased entertainment value

Patrons will be more engaged for longer periods with the use of slot tournament leaderboards, progressive tournaments and the chance at rewards. This has the effect of raising trip length and the win.

Reward specific members with Exclusive Tournaments

Now it is easier to invite and register many of your better slot players with exclusive tournaments. The result is a happier, more rewarded loyal patron – critical in a competitive marketplace.

Operate many tournaments at once

Scheduling of tournaments can be set for off peak hours and / or days with registration open at any time. Hosts can take registrations, process refunds or respond to other requests for any active tournament through a user-friendly interface.

Customers Can Serve Themselves

With a self-registration kiosk, customers can register themselves in free slot tournaments and choose session dates and times that suit them. Reduce customer service issues at your player's club desk.

Add Stand-alone Promotions

Along with our self-serve kiosk, during non-tournament times, use the kiosk to offer in-casino promotions with automated balloting.

New! Tablet Scoring

With STMS 2.8 we have made many of the tasks that you are currently doing with a clipboard and paper faster and easier. Here's how we have improved Scoring and Player Verification.

Scores can now be entered directly into STMS at the end of each session with a wireless Tablet PC and Tablet friendly user interface.

Many gaming jurisdictions require a player's signature to validate a session score. Now players can simply sign right on the Tablet PC and confirm their scores. Simply select the player and enter the score right on the Tablet PC. All signatures are safely stored in the database.

Integrated STMS Video Display Manager

The built-in video display manager allows for customized marketing material to be displayed on screens during inactive periods. Users have the ability to upload, select and schedule promotional content through the display environment through the Slot Tournament Management System interface.

The STMS Video Display Manager can be used to present Flash and HTML based marketing material and information during inactive tournament periods.

Marketing material may include information on tournaments, registration details, casino events, promotions and important notices. Display information on LCD televisions, monitors or Strategy9's SwipelQ kiosks which also come equipped with a printer so that contest ballots, coupons and registration tickets can be issued on spot.
